

VISHNURAJ D

India — +91 8129205862 — vishnurjd@gmail.com

Portfolio — LinkedIn — GitHub

Professional Summary

Versatile Software Engineer dedicated to building scalable systems at the intersection of Full-Stack Web Development, Web3, and Artificial Intelligence. Proven expertise in designing high-performance React/Next.js frontends and architecting event-driven cloud backends using AWS Serverless pipelines and containerized microservices. Passionate about solving complex technical challenges from end-to-end, including decentralized Ethereum L2 payment protocols, Agentic AI workflows, and hardware-integrated IoT APIs.

Technical Skills

Programming: TypeScript, JavaScript, Python, Java, C/C++, Solidity, SQL, HTML5/CSS3

Frameworks & UI: React.js, Next.js, Node.js, Express.js, FastAPI, Flask, Spring Boot, Tailwind CSS

Cloud & DevOps: AWS (Lambda, SQS, EC2, S3), Docker, Nginx, Linux, Git, REST APIs, Microservices

Web3 & Blockchain: Ethereum L2s, Account Abstraction, Smart Contracts, Ethers.js, MetaMask Integration

AI & Data Engineering: Agentic AI, Generative AI (LLMs), LangChain, TensorFlow, Pandas, NLP

Databases: PostgreSQL, MySQL, MongoDB, Redis

Professional Experience

IoT Developer Intern — Soften Technologies

Kochi, India

Jan 2024 – Mar 2024

- Designed and deployed REST APIs using Flask, enabling real-time communication between mobile applications and IoT devices.
- Integrated ESP8266 microcontrollers with cloud backend services for smart home automation.
- Improved system responsiveness and network reliability by optimizing backend data workflows.

Web Development Intern — Tech Telesto Pvt Ltd

Bangalore, India

Jun 2023 – Dec 2023

- Built scalable web application modules using PHP, JavaScript, and MySQL.
- Designed relational database schemas for secure transaction processing.
- Integrated third-party APIs and optimized UI responsiveness to improve user experience.

Selected Projects

GlobalPay — Web3 Cross-Border Payments

- Architected a decentralized NeoBank supporting instant cross-border fiat-to-crypto remittances.
- Built gasless transaction workflows using Ethereum L2s and Account Abstraction.

DataRefine — Serverless AI Dashboard Generator

- Built an AI-powered analytics platform using Next.js and AWS Serverless.
- Designed an event-driven ETL pipeline using AWS Lambda and SQS.

TrustAgent — Autonomous AI Contract Officer

- Developed an Agentic AI system for blockchain-based contract verification.
- Automated escrow payout workflows based on AI verification logic.

NeuroTrade — AI Algorithmic Trading System

- Built a quantitative trading simulator using Python, TensorFlow, FastAPI, and React.
- Developed predictive models for market trend analysis using real-time data.

Juris Clarity — AI Legal Literacy Platform

- Developed an OCR-powered Generative AI pipeline for legal document analysis.
- Integrated conversational AI for real-time legal assistance.

Education

Cochin University of Science and Technology

Master of Computer Applications (MCA)

Graduated 2026

Focus: Software Engineering, Cloud Computing, Advanced Data Structures

Mahatma Gandhi University

Bachelor of Computer Applications (BCA)

Graduated 2024

Focus: Computer Science, Programming, Database Management

Certifications

- AWS Solutions Architecture Job Simulation (Forage)
- IBM Data Science Professional Certificate
