

VISHNURAJ D

Software Engineer — Web3 & Full-Stack Developer

+91 8129205862 — vishnurjd@gmail.com — India — LinkedIn

Summary

Full-Stack and Web3 Developer with experience building blockchain-integrated fintech platforms, AI-based trading systems, and scalable backend services. Skilled in designing real-time systems, API architectures, and crypto-enabled applications using modern technologies.

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, Java, C/C++, SQL, HTML5/CSS3

Frameworks & Libraries: Node.js, Express.js, FastAPI, Flask, React.js, Tailwind CSS, Spring Boot

Databases & Storage: MongoDB, MySQL, PostgreSQL, Redis

Web3 & Blockchain: Ethereum, Ethers.js, MetaMask, Wallet Integration

AI & Data: TensorFlow, Pandas, NumPy, NLP, LangChain

DevOps & Tools: Git, Postman, Docker, Nginx, AWS (EC2, S3), Azure, Linux (Ubuntu)

Core Concepts: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Microservices, REST APIs, Real-time Systems, System Design

Experience

IoT Developer Intern — Soften Technologies

Jan 2024 – Mar 2024

- Developed IoT-based automation system integrating ESP8266 devices with Flask backend services
- Designed REST APIs for real-time communication between mobile applications and hardware systems
- Improved system responsiveness and reliability through optimized data handling workflows

Web Development Intern — Tech Telesto Pvt Ltd

Jun 2023 – Dec 2023

- Built full-stack modules using PHP, JavaScript, and MySQL for scalable web applications
- Implemented backend logic, API integrations, and structured database workflows
- Enhanced UI responsiveness and performed debugging to improve application performance

Projects

Vaultify — DeFi Smart Finance Platform

- Architected a decentralized finance platform enabling secure crypto asset management and transactions
- Integrated Ethereum smart contract interaction using Ethers.js with wallet connectivity via MetaMask
- Designed scalable APIs and real-time dashboards for tracking financial data and user activity

NeuroTrade — AI Crypto Trading System

- Engineered an AI-driven trading system leveraging real-time market data and technical indicators (RSI, MACD)
- Implemented strategy-based decision logic to generate automated trading signals
- Developed an interactive dashboard for monitoring performance, analytics, and trading insights

ZkDetect — AI Media Processing System

- Built a high-throughput FastAPI microservice capable of processing 1000+ media files efficiently
- Implemented hash-based identification to ensure data integrity and traceability
- Designed modular APIs for seamless integration with AI/ML pipelines and scalable systems

UPI CryptoConnect — Hybrid Payment Platform

- Developed a hybrid payment system integrating UPI banking with cryptocurrency transactions
- Enabled secure peer-to-peer transfers and unified transaction tracking
- Mapped UPI identifiers to blockchain wallet addresses for seamless interoperability

IoT Powered Automation

- Designed a smart home automation system using ESP8266 and Flask for real-time device control
- Built APIs for communication between IoT devices and web/mobile interfaces

Education

Master of Computer Applications (MCA)

2024 – 2026

Cochin University of Science and Technology

Bachelor of Computer Applications (BCA)

2021 – 2024

Mahatma Gandhi University

Certifications

IBM Data Science Professional Certificate

AWS Solutions Architecture Job Simulation
